

The Regional Growth Management Plan will serve as a guide for coordinating comprehensive planning among the 103 municipalities, 3 counties and regional planning agency within the Tri-County area. This plan is a working document that will serve as the foundation for future county comprehensive plans, regional transportation plans, and other updates.

The Regional Growth Management Plan is designed to encourage inter-jurisdictional cooperation of ongoing planning for land use, transportation, economic and cultural development and to revise physical growth policies to the year 2020 for Cumberland, Dauphin and Perry Counties.
